

1 - Triangle

Triangle

By starting at the top of the triangle and moving to adjacent numbers on the row below, the maximum total from top to bottom is 27.

```
    5
   9 6
  4 6 8
 0 7 1 5
```

I.e. $5 + 9 + 6 + 7 = 27$.

Write a program in a language of your choice to find the maximum total from top to bottom in [triangle.txt](#), a text file containing a triangle with 100 rows. Send your solution and resume to [123456 AT yodle dot com], replacing 123456 with the maximum sum for the triangle.
